

W230/W350/W500

ELEGANT COMPACT POWERFUL

PRECISION, PERFORMANCE AND SPEED
AT THE HIGHEST LEVEL

W230
W350
W500

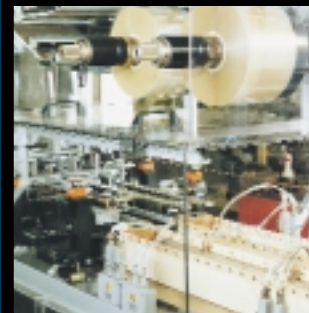

WRAPPING MACHINERY

CONSTRUCTION FEATURES:

- Rugged construction
- Trailing edge seal
- Single main shaft drive
- Scissor action guillotine
- Positive gripper control of the film
- Reciprocating film draw for higher speed applications
- Controlled product feed to the film
- Intermittent product outfeed drive
- Reciprocating end sealers
- PLC control

OPTIONAL FEATURES:

- Tear tape with tab
- Print registration
- Coding (inkjet/laser for high speed operation)
- Twin film reels
- Auto splice
- Manual splice deck
- Leaflet insertion
- External collating options
- Vibration device for granular products
- Levelling device for powder products
- Over height pack rejection
- Paper with hot melt option
- Discharge turning and stacking device
- Concealed lateral sealing
- Jumbo film feed

WRAPPING MACHINERY

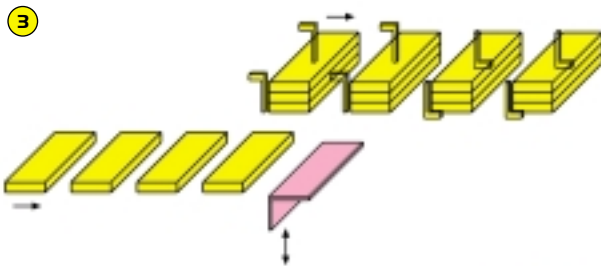

A machine from the W range can wrap packs that are boxed or rectangular, hard or soft, individuals or collations, even with rounded corners and edges.

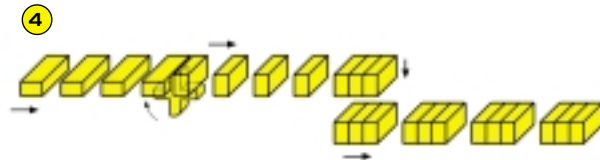

In-line infeed with single pack separation

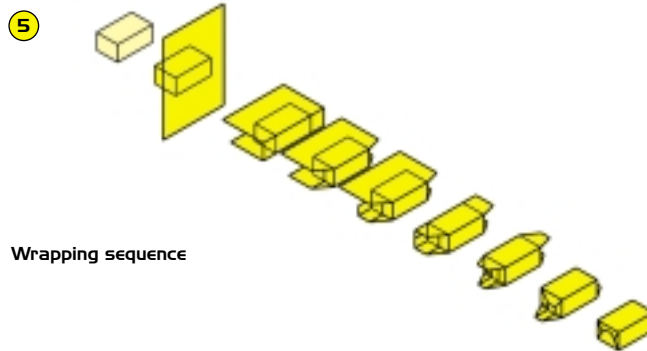

In-line infeed with collation and group separation

In-line infeed with stacking

In-line infeed with pack rotation and collation

Wrapping sequence

TECHNICAL DATA:

Film width:	W 230: 230 mm W 350: 350 mm W 500: 500 mm
Film length:	W 230: 200 mm W 350: 600 mm W 500: 600 mm
Longer film draws can be achieved against special design	
Film material:	Sealable polypropylene 15 - 40 µm Polyethylene 25 - 60 µm Rigid PVC Heat sealing paper (with hot melt option)
Size range:	W230 up to 80mm high W350 up to 120mm high W500 up to 120mm high The height can be extended up to 150mm on the W350 and W500 machines, against special design.
Size change:	Approximately 30 minutes for single pack wrapping machines Approximately 60 minutes for collated pack wrapping machines
Output:	Up to: W230: 160 W350: 120 W500: 100 units per minute depending on pack size
